Sound English Software

## Developed and co-published with Greygum Software

Using many learning strategies, the software allows students to hear and practise the sounds, rhythms and flow of English.

Sound English® software is for Windows (XP and later) and Macintosh (OS X 10.5.x and later).

Reading
Each word is underlined as it is spoken by a human voice. Click on any word to hear that word and see the sound highlighted.
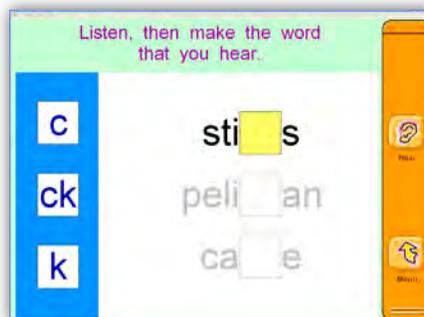

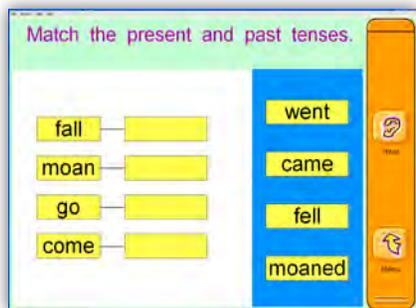

Her **y**oungest son, **R**ussell, was **u**pset too. He had **m**u**d** on the front of his jumper.

Questions
Every book has a set of questions that focus on helping the student understand the content.

Which is the missing word?
- those
- too
- these
- the

This is the backpack I got at ☐ market.

Activities
There is a set of activities for each book. Instructions are spoken. Students can click on any word or sound to hear it again.
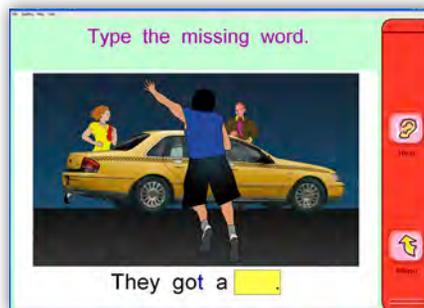

Match the present and past tenses.

fall	went
moan	came
go	fell
come	moaned

Activities
Activities range from simple to difficult. The teacher can control which are presented or hidden. (See below.)

Listen, then make the word that you hear.

c ck k

sti☐s
peli☐an
ca☐e

Write
Students gain confidence from writing their own version of a book, then hearing the computer read their story.

I play football.
I try to kick the first goal.
Last week I did kick the first goal.

Spelling
Students work with a variety of spelling activities using the words in each story. Clues and assistance are offered if required.

Type the missing word.

They got a ☐.

A fully-featured Lending Library Edition is also available: see overleaf for full details.

Teacher
Teachers have protected access to comprehensive options, control panels and a record-keeping system for each student.

Software Licensing Policy
• One copy of a software package may be used on one computer.
• Two copies constitute a site license for a single campus of an educational institution. This grants the right to install a package on all the stand-alone computers owned by that institution at that campus, including networked computers on that site.

  For example, a site licence covering all an institution's computers on a single campus for both Preliminary Level and Level 1 Books 1-10 would require the purchase of four packs: two of Preliminary Level and two of Level 1 Books 1-10. The total price would therefore be $396 + $8 shipping.

Personal Editions
for iPad®, iPhone® and iPod Touch®

*The **Personal Editions** for iPads, iPhone* and iPod Touch include only the Reading activity. They are available from the iTunes Store. RRP: AUD$10.49 for each level (P, 1A, 1B).* * iPhone 3GS or later

Available on the App Store

Lending Library Editions

Sound English Software Lending Library editions are now available for use by borrowers registered with public and educational institution libraries. They are suitable for both Windows and Apple OS X systems.

How does it work?
Borrowers may take home the CD-ROM and install the software on their computer (Windows or Mac). At the end of the normal borrowing period an on-screen notice reminds the borrower that the loan must now be returned, and the software stops working.

Ordering
When ordering, we need two vital pieces of information because each CD-ROM is individually tailored to the purchaser's needs.

1. Please state EXACTLY the name of the library as you wish it to appear on the borrower's screen. There is a limit of 29 characters, including spaces.

2. The length of the borrowing period in days. This will be fixed and can't be altered once the CD-ROM is prepared.

Allow 7 days for orders to be shipped.

Price
RRP $198 per set of ten books, plus $8 shipping per order (any quantity)
